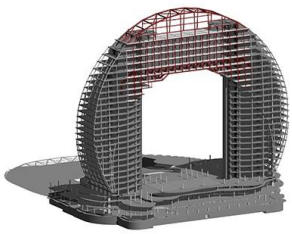
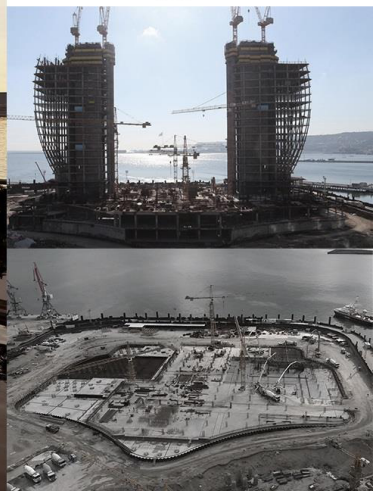
Crescent Hotel

Baku, Azerbaijan / 2014-2015

Owner	Gilan Holding
Client	AECOM
Scope	detailed design





The Crescent Hotel is a curving arched building. It is designed to look like a crescent moon with its points on the surface of the Caspian Sea. The crescent shape of the building refers to one of the symbols of Azerbaijan, depicted on its national flag. The skyscraper's arcuate configuration will not affect the interior of the hotel as the building will rely on two multi-storey column-like towers, which will create additional space and act as a support for the hotel.

The Crescent Hotel comprises 32 floors (28 storeys of the hotel itself standing over a 4-storeys podium).
